Maternal health is the health of women during pregnancy, childbirth, and the postpartum period. It encompasses the health care dimensions of family planning, preconception, prenatal, and postnatal care in order to ensure a positive and fulfilling experience, in most cases, and reduce maternal morbidity and mortality, in other cases. Maternal health revolves around the health ...

01.12.1999 · Case Studies in Partner Violence A more recent cross-cultural research demonstrates that this is not the case.2 Societies exist in which violence is rare and violence against women virtually 24.07.2013 · Case studies provide real-life examples of our policies in practice.
